

THE SIMPLE FORM OF HAPPINESS

RUUKKI® HYYGGE

RUUKKI

HYGGE

The Simple Form of Happiness

This short, humble Danish word, untranslatable to other languages describes everything that matters in life: a sense of closeness and security, peace of mind and cosiness. It represents a Scandinavian art of happiness and states the need for comfort and the joy of simple pleasures.

When home is hygge...

It becomes a safe haven for a whole family that gathers round and prepares to face the challenges of the outside world. It allows them to enjoy each other's company, intimacy and every day rituals. It is a space of children growing, loved-ones visiting, laughter ringing and coffee flowing by the candle light.

Simple, modern, cosy home close to nature – a place that evokes feelings. Ruukki® Hygge, The Simple Form of Happiness, was created for such home.

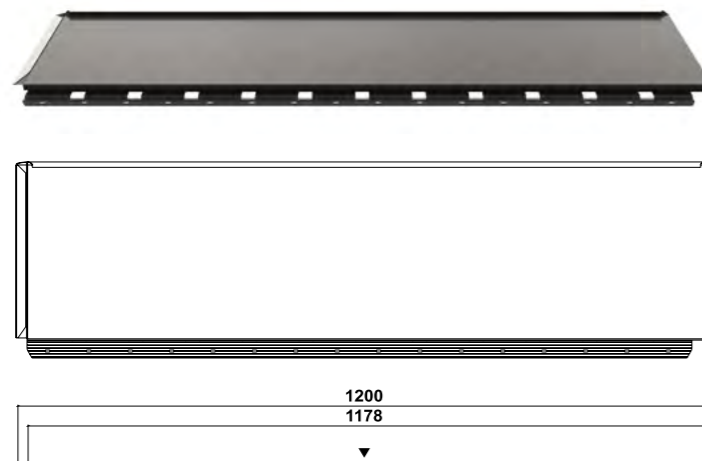

RUUKKI® HYGGE

Flat modular roof

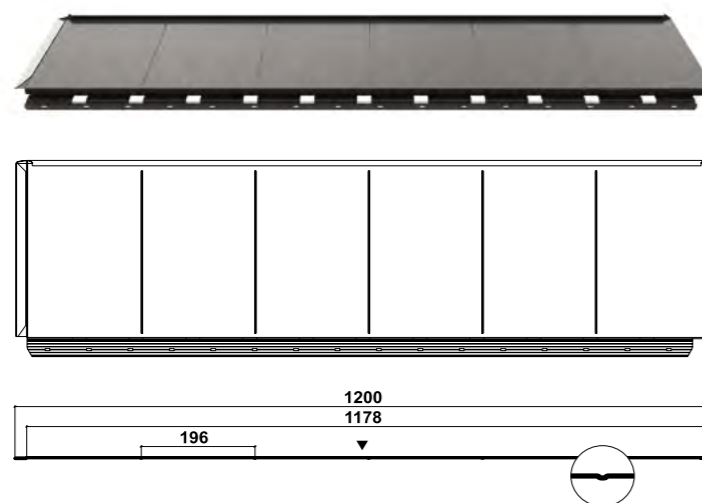

Ruukki® Hyygge is an innovative roofing product perfectly matching modern architectural trends with its simple and elegant form. It is available in two versions – with and without grooves – allowing for three different roofing patterns.

Specially designed system of original metal flashings ensures an aesthetic look of the roof and guarantees its correct performance. Together with roof safety products and ventilation products, Ruukki® Hyygge comes as a complete roofing package.

High quality

Smooth surface

3 colours

3 patterns

• High quality

The steel of highest Scandinavian quality from the Swedish steel company SSAB is used to produce Ruukki® Hyygge roofing system. The steel of 0.6 mm thickness is coated with cutting-edge GreenCoat Purex coating layer. Semi matt coating is extremely resistant to scratches and UV radiation. Ruukki® Hyygge is available in Ruukki 40 quality class, which translates into 40 years of technical warranty and 15 years of aesthetic warranty.

• Smooth surface

Ruukki® Hyygge matches the newest trends in architectural design. Innovative solution of vertical and horizontal locking system, allows to hide the connecting fittings (screws), which highlights the simple form of the roof and improves the aesthetics.

• 3 colors

Ruukki® Hyygge is available in three most popular colour options, that fit right into the modern construction trends: anthracite, graphite and black.

• 3 patterns

Ruukki® Hyygge roofing system can be aligned in three different patterns allowing for individual design preference. There is brick or linear pattern for panels with grooves and brick pattern for panels without grooves.

COMPLETE ROOF

Ruukki® Hygge

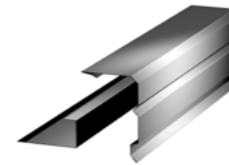

There is nothing more important than a good, safe, secure home where we spend most of our lives. Well-designed roof represents not just the aesthetic values of a home but its safety and comfort. A complete roofing system created for Ruukki® Hygge is a warrant of those significant principals. The complete roof should contain

several elements of roof communication, snow protection systems, ventilation systems and specially designed set of flashings that go well with the shape and function of the roof. Only combining all those elements guarantees the perfect look, correct performance and long years of impeccable functioning of Ruukki® Hygge roofs.

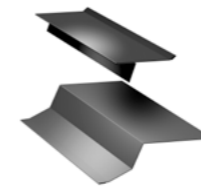

1 Ruukki® Hygge ridge cap

Ruukki® Hygge ridge cap is made with three elements. Each of them is perforated and responsible for an effective roof surface ventilation. The specially designed shape of the ridge cap hides the fasteners making them invisible.

2 Ruukki® Hygge verge trim

Ruukki® Hygge verge trim is made with two elements. The base of the verge trip ensures the air-tightness and the masking element makes it aesthetic. This element is specially shaped to hide the fasteners.

3 Ruukki® Hygge eaves flashing

Ruukki® Hygge eaves flashing is made with two elements. The base, together with the masking create a complete solution that is equally durable and aesthetic at the same time.

4 Ruukki H-FIX roof underlay

Three-layered H-FIX underlay has particular vapour permeable qualities. The double adhesive strip guarantees tightness of the roof.

5 Roof safety

Roof communication system and snow protection system is available in a selection of sizes allowing for custom fitting to different roofs.

6 Ventilation fan

Ventilation chimney is made out of acid-resistant steel and together with profiled base ensure the safe assembly. Insulated or non-insulated options are available.
